

DEVELOPMENT AND DESIGN

Exposed initial evaluations

Internal: 34,593 records
PhishVN: 8,701 records
Diagnosis → candidate design only

Unchanged PhiUSIIL partitions

Training: 166,248 records
Scaler and candidate coefficients only
Validation: 32,695 records
Threshold selection only

Before external scoring

Freeze candidate and threshold
Retain unchanged 25-feature comparator
No external threshold selection

ADDITIONAL EVALUATION

Publisher 2020 benchmark

11,430 labeled source rows
Retrospective URL-only comparison
No live destinations fetched

Eligibility before predictions

Valid URLs and duplicate rules
Exclude domains in retained full
PhiUSIIL / PhishVN manifests
2,808 rows quarantined

Admitted benchmark

8,622 rows; 6,273 domains
Phishing: 4,651; legitimate: 3,971
Evaluation only; not development data

One paired comparison at frozen operating points

All admitted rows + prescribed HTTP(S) companions
Saved predictions → metrics and domain-cluster intervals
Separate arithmetic verification; no refitting or new predictions
